

Bravus 3500 MX Magnet

HIGH-END-SECURITY

ABUS Bravus.3500 MX Magnet offers you security at the highest level - thanks to integrated magnet technology, standard SKG*** security equipment and technical copy protection.

Technical details

- patented Intellitec system guarantees high technical copy protection, highest protection against illegal key copies (multi-dimensional interrogation)
- Maximum flexibility due to modular design
- magnetic technology in the key and cylinder protects against 3D key copies
- 3. safety level in the Bravus system (3 locking rows)
- 10 spring loaded locking elements and up to 6 code pins in three locking rows
- 14 mm core diameter
- 6-pin system
- increased pulling protection due to stainless steel module bar as standard
- increased drilling protection as standard due to hardened steel pins and drilling protection inlay made of stainless steel
- SKG*** certification
- complies with VdS A
- according to DIN 18252 and DIN EN 1303
- patent protection until 2038, unlimited trademark protection

DIN EN
1303

DIN
18252

Execution

- cylinder body: nickel plated brass
- reversible key system
- modular design - maximum flexibility
- horizontal, easy key insertion

Special equipment

- different cylinder finishes *
- emergency and danger function
- freewheel
- locking cam
- caps with transponders

Operational area

- indoors and outdoors
- in conjunction with DIN mortise locks

* this selection extends the delivery time
