## easy 2.0 mechatronic key

### Mechatronic key SE- key with integrated transponder for WILKA easy

A key for combining mechanical and electronic components in a locking system. The authorized user only needs one medium to operate the system

Key can only be ordered in conjunction with cylinder order type E203 - E215.

#### Execution

- blue key cap with integrated Mifare<sup>®</sup> 1k
- key shaft in nickel silver
- mechanical and electronic locking authorisation
- unprogrammed
- can be combined with the systems WILKA SI6 or 3VS, Carat S1 and Carat S3

SKU WI.easy.SE

Producer No. WI.easy.SE

SCHLIESSTECHNIK

## easy 2.0 programming card E295

In the simple version, the user only needs the programming card in addition to the IDs. An ID is taught-in by presenting the programming card in front of the cylinder, fitting or reader and then presenting the user ID. If an ID transponder is lost, all of them can be deleted using the programming card and the existing ones taught-in again.

Only one programming card is required per system!

#### Execution

- with integrated MIFARE Classic<sup>®</sup> 1k transponder
- prepared as programming card
- dimensions: 85,5 x 54 x 0,8 mm, white with WILKA logo
- does not work in conjunction with software

SKU WI.easy.E295

Producer No. E.295
